Document Revision

Version 1.0 (Standard
Release)

System Access & Authentication

Authentication is role-governed. Registered users sign in with their assigned username and password, while newly invited faculty members access the registration portal via a cryptographic token received by email.

AUTHENTICATION PROCEDURE

- **Username:** Alphanumeric identification format assigned during registration.
- **Password:** Password authentication validated securely over HTTPS.
- **Persistent Session:** Session state persists across secure subdomains.
- **Invitation Redemption:** New users select "Register here" using an email token.

AUTHORIZATION PERMISSIONS

- **DEPARTMENT_HEAD:** Administrative privileges including user roles and system settings.
- **SECRETARY:** Write access to schedule meetings and record committee minutes.
- **DEPARTMENT_MEMBER:** Read-only access to view committee records and signed minutes.

The dashboard displays all active departmental committees. Each committee card outlines membership counts, scheduled meetings against allocated quotas, creation dates, and administrative actions.

Committee Overview & Secretary Assignment

The Committee Overview presents full committee details including coordinator assignment, active secretary, meeting rosters with agenda items, and scheduling controls.

SECRETARY ASSIGNMENT WORKFLOW

- **Secretary Status:** Indicates the currently designated secretary for the committee.
- **Assign / Change:** Department Heads click to reveal the member selector dropdown.
- **Write Privileges:** Assigning a secretary grants meeting scheduling and minute drafting rights.
- **Multi-Committee Assignments:** A member can be assigned secretary for multiple committees.

DIRECT ACTIONS & ROSTER

- **+ New Meeting Button:** Pre-selects this committee and opens the meeting form.
- **Edit Minute Template:** Configures customized intro and header text for this committee.
- **Meeting Card Agendas:** Meeting cards display agenda titles directly on the overview.

Meeting Scheduling & Agenda Management

The meeting scheduler defines meeting indices, date, time, venue, and numbered agenda items. Saved agendas automatically populate the meeting's subsequent minute workspace.

Save meeting and refine entries with AI

MEETING DETAILS

- **Target Committee:** Committee association (pre-filled if launched from overview).
- **Meeting Number:** Sequential meeting identifier for formal records.
- **Date & Time:** Meeting commencement time and calendar date.
- **Meeting Venue:** Physical room, administrative office, or virtual platform.

AGENDA FORMULATION

- **Numbered Agenda Items:** Add discrete discussion topics sequentially.
- **Agenda Details:** Optional notes outlining background discussion points.
- **Minute Synchronization:** Agendas synchronize directly with minute decision blocks.

Meeting Minute Workspace & Attendance

The minute editor provides live document rendering in standard Nepali or English institutional formats, re-arrangeable attendance ordering, direct editing, and Word/DOCX file export.

Figure 5.1: Attendance Reorder Dialog & Minute Workspace

/committee-details/overview/minute?meetingId=1

ATTENDANCE ORDER MANAGEMENT

- **Drag-and-Drop:** Arrange attendee hierarchy using the drag handle.
- **Database Persistence:** Customized participant ordering persists in the database.
- **Formatting Options:** Supports rendering attendance in tables or numbered lists.

EXPORT & OUTPUT OPTIONS

- **Convert to Word:** Generates formatted `.docx` files with official institutional headings.
- **Edit Directly:** Inline text correction capability for direct adjustments before signing.
- **Print Support:** Formatted A4 output ready for physical printing and archiving.

Per-Committee Minute Template Library

Committees maintain custom opening paragraphs and header templates. Dynamic placeholders are substituted with meeting parameters during document generation.

Variable Token	Description	Nepali Format Example	English Format Example
{date}	Formatted meeting date	२०८२/०५/१५	September 5, 2026
{time}	Meeting start time	२:०० बजे	2:00 PM
{place}	Configured meeting venue	सभागृह	Executive Boardroom
{committeeName}	Official committee name	शैक्षिक समिति	Academic Committee
{coordinator}	Committee coordinator name	प्रा. डा. हरि बहादुर	Prof. Dr. Hari Bahadur

Template Administration: Department heads and secretaries can create, rename, activate, or remove templates. The active template is automatically applied to newly drafted minutes.

Member Directory & Side Panel Editor

The Member Directory provides a roster of academic personnel. Selecting **Edit** on a member opens the **Side Panel User Section** to update professional designations, bilingual names, and contact details.

SIDE PANEL USER FIELDS

- **First & Last Name (English):** Standard international spelling.
- **Nepali First & Last Name:** Official Devnagari spelling for formal minutes.
- **Nepali Pad / Title:** Academic honorifics (, , ,).
- **English Pad / Title:** English academic designations (, ,).
- **Post:** Official post (e.g., Campus Chief, HOD, Director).
- **Institution & Email:** Academic institution and contact email.

VALIDATION & SYNCHRONIZATION

- **Validation Rules:** Enforces required names and valid email formats.
- **Safe Close Guard:** Protects against accidental dismissal without saving.
- **System-wide Sync:** Profile updates reflect across all committee rosters.

User Accounts & Multi-Domain Invitations

Department Heads manage user credentials, invite new faculty members via multi-domain email invitations, and delegate authority roles within the department.

INVITATION DISTRIBUTION

- **Multi-Domain Support:** Invitations can be delivered to any valid email address (`@gmail.com` , `@yahoo.com` , or custom domains).
- **Role Pre-Selection:** Pre-assign role as `DEPARTMENT_HEAD` or `DEPARTMENT_MEMBER`.
- **Committee Binding:** Optionally pre-assign the recipient to a target committee.
- **One-Time Token:** Secure token ensures only the recipient can register.

ROLE DELEGATION

- **User Table:** Overview of user names, usernames, emails, and roles.
- **In-line Role Modification:** Promote or demote users directly via dropdown.
- **Immediate Effect:** Role adjustments update security permissions immediately.

System Settings: AI Model Configuration

Department Heads can configure AI language model endpoints and API credentials directly through the user interface without restarting the backend application server.

Configuration Parameter	Description	Supported Values
Provider Protocol	API request payload structure	OpenAI Chat (/v1/chat/completions), Anthropic Messages (/v1/messages), OpenAI Responses
Base URL	HTTP root endpoint of the AI provider	https://api.openai.com/v1 or https://opencode.ai/zen/v1
API Key	Provider secret authorization token	Encrypted secret key saved dynamically in application database
Model Identifier	Target model name	gpt-4o, claude-3-5-sonnet, or muse-spark-1.2-contributor-free
Max Output Tokens	Maximum response token generation budget	Configurable integer (Default: 2500)

Integrated Diagnostic: The "Test AI Connection" utility tests connectivity with the specified base URL and API key, reporting status before settings are saved.

System Settings: SMTP Email Configuration

Outbound email parameters are configured dynamically to deliver member registration invitations and meeting notifications without redeployment.

AI Model Configuration
Email (SMTP) Configuration

SMTP Mail Server

Configure SMTP credentials for sending user registration invitations and meeting notifications to any email address.

SMTP Host

SMTP Port

Standard ports: 587 (TLS/STARTTLS), 465 (SSL), 25

Username / Sender Email

Password / App Key Password is set in backend

..... (Leave blank to keep existing password) Show

For Gmail, use a 16-character App Password (not your account password).

Sender From Header (Optional)

Frontend Base URL

Used for constructing invitation and meeting links sent via email.

☒ Enable SMTP Authentication (AUTH LOGIN)

☒ Enable STARTTLS Encryption

Send Test Email

Clicking Send Test Email will save the current SMTP settings above and immediately dispatch a test email to the address entered below.

MAIL SERVER PARAMETERS

- **SMTP Host:** Outgoing mail server (e.g., `smtp.gmail.com`, `smtp.office365.com`).
- **Port & STARTTLS:** Standard submission ports (`587` or `465`) with TLS encryption.
- **Username & Password:** Authenticated sending mailbox and application password.
- **From Address:** Sender address displayed on invitation emails.

INTEGRATED EMAIL TESTING

- **Diagnostic Tool:** Enter a recipient address and click "Send Test Email".
- **Handshake Feedback:** Verifies authentication and STARTTLS handshake live.
- **Dynamic Reload:** Saved parameters update mail sender beans in real time.

Meeting Archives & Global Search

Historical records are preserved in the archives, and global search enables rapid cross-referencing of committees, members, agenda items, and official decisions.

ARCHIVE CAPABILITIES

- **Record Preservation:** Retired or concluded committees remain accessible.
- **Export Availability:** Historical minutes retain Word and print export capability.

GLOBAL SEARCH SYSTEM

- **Header Accessibility:** Activated via the search button in the top navigation bar.
- **Multi-field Index:** Queries across committee names, members, agendas, and decisions.
